

Save Earth from  
Anthropogenic Movement

## Vision

Sustainable future through coexistence and sustainable actions.

## Mission

Work towards sustainability by creating change agents and change agencies at individual, organizational & community levels.

## Values

Co-existence, Self-reliance, Self-sufficiency and Inherent Ethics.

- SEA Movement expands to Save Earth from Anthropogenic Movement. Registered as a non-profit trust in Chennai during October 2008.
- Our focus is climate change and sustainable development.
- We advocate mitigation through change in Humans' lifestyle and advocate adaptation to climate change through soil and water conservation.
- Our core team includes experts and consultants from Environmental related disciplines.

Climate change and its effects are evidently witnessed over past 5-10 years

## Why fighting for climate change is so urgent? ►

Climate change is mainly due to human influenced unsustainable activities, resulting in 36.6 GtCO<sub>2</sub> Annual global emission.

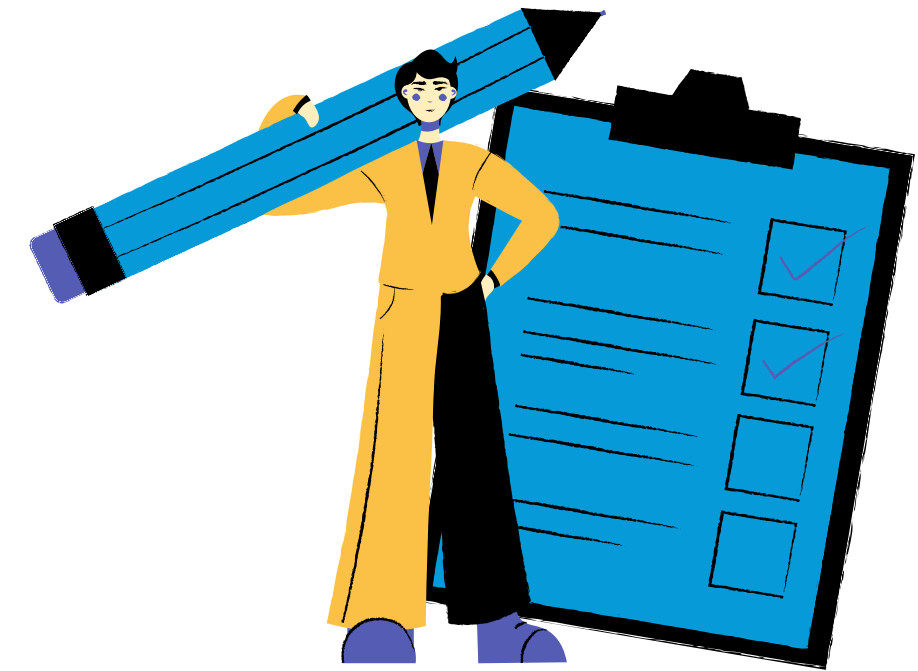

As a result of higher emissions, the consequences we are facing are:

- Rise in surface temperature that is directly affecting water-food-energy nexus.
- Prolonged heat waves resulting in extended summers & frequent forest fires.
- Recurrent Droughts, Cyclones and Floods damaging livelihood causing migration.
- Loss of Biodiversity leading to collapse in all ecosystem and food chain.

**Our basic survival is questionable if we don't act now !**

-  Build preparedness through planning, to manage Climate effects
-  Develop right understanding towards Coexistence
-  Strengthen collective action and Solidarity

 **Natural resource management**

 **Food & Agriculture**

 **Energy & Environment**

 **Health & Sustainability**

## Our areas of work

 An illustration of a globe being held up by several hands of different colors.

**Climate champion program**

 An illustration of a cardboard box overflowing with various household items like a lamp, books, and fabric.

**Declutter repurpose program**

 An illustration of a red bin with a recycling symbol and the text 'E-WASTE' on it, containing electronic devices.

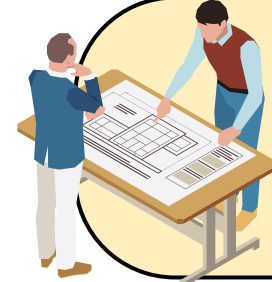

**E-waste management program**

 An illustration of a cluster of green trees of varying heights.

**Food forest development**

 An illustration of stylized human figures in various colors (green, orange, pink, blue, purple) arranged in a circle.

**Climate resilient community**

 An illustration of two people looking at architectural blueprints on a table.

**Eco-friendly architecture**

 An illustration of a hand holding a shopping basket with a plus sign and a minus sign, symbolizing conscious consumption.

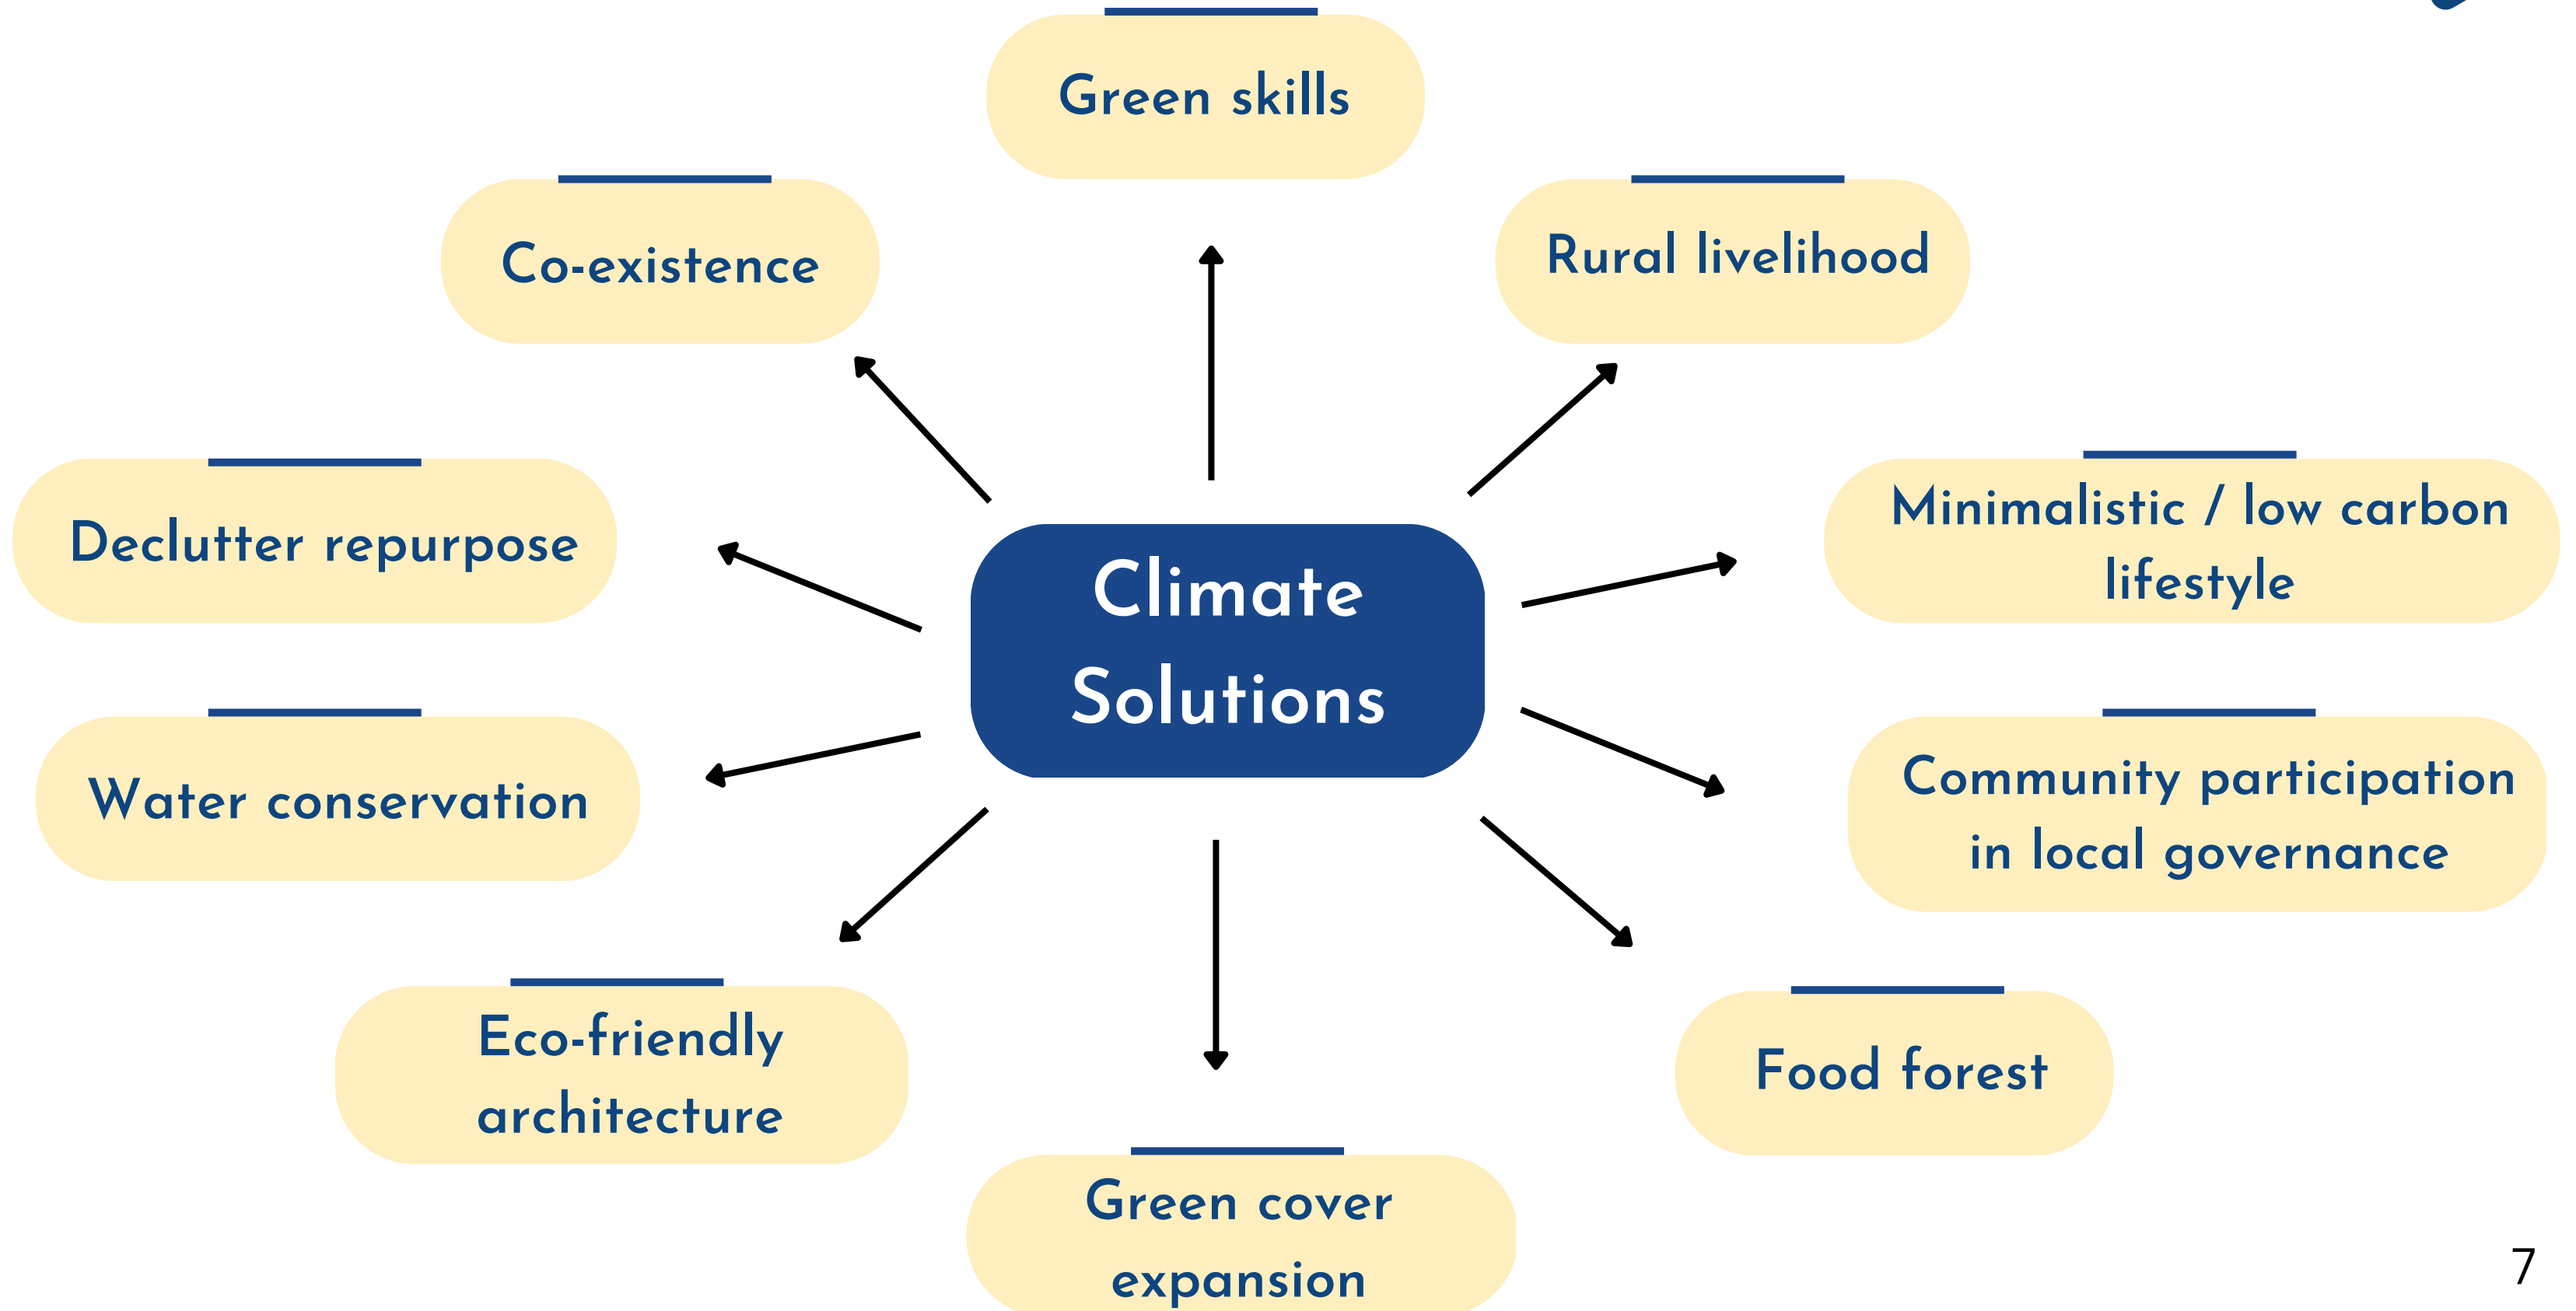

**Conscious consumer group**

 An illustration of two hands shaking, with arrows indicating a flow or exchange.

**Fair trade program**

 An illustration of a person standing next to a circular diagram with various icons representing different aspects of sustainability and community.

**Inclusion of sustainability**

# Our past work and Impact ▶

20000+ Tree saplings planted

3000+ Farmers trained on organic farming

1000+ Farmers linked to fair price market

Reached 50000+ Consumers on food safety awareness

Reached 10000+ Students for environmental education

Reached 500+ Individuals for livelihood skill training

**Climate literacy  
development**

**Green cover expansion**

**Climate resilient  
communities'  
formation**

**Food forest  
promotion**

**Safe food /  
Fair trade campaigning**

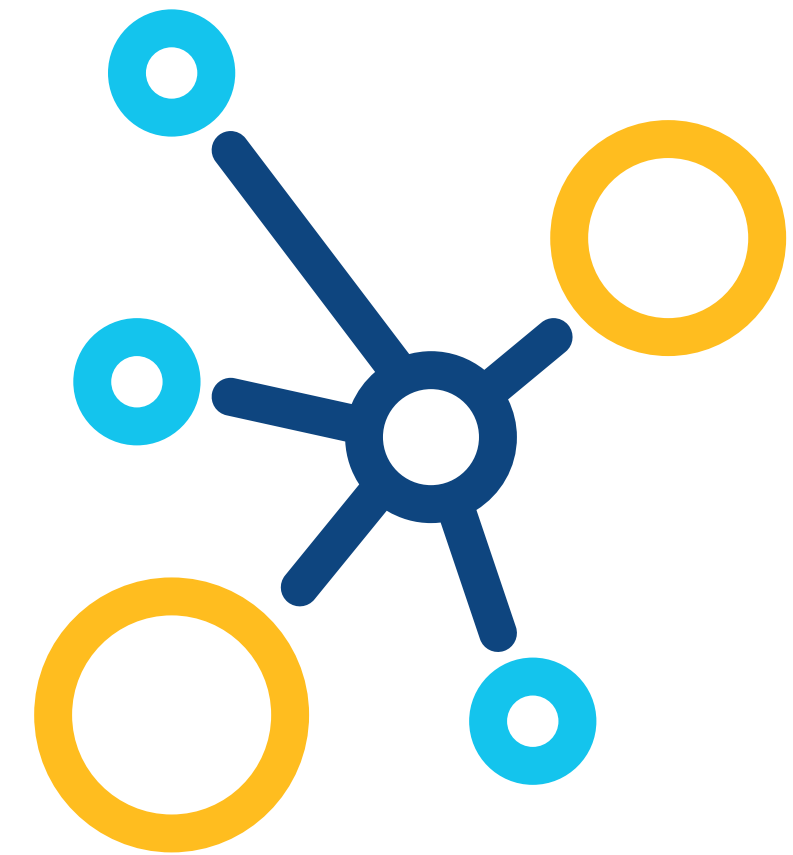

## For Urban and Rural areas

- To build Climate literacy among all communities and stakeholders.
- To make Communities prepared to face the effects of climate change.
- To support Research and inventions in sustainable development.
- To promote Low-carbon lifestyle and build conscious consumer groups.
- To establish Rural enterprises to reduce migration to urban areas.
- To build Climate partnership across Tamil Nadu state.
- To develop Food forests & community nurseries to increase the green cover.
- To document Traditional wisdom and indigenous practices on Sustainability.

## Partners / Stakeholders

- ◆ Individuals
- ◆ Communities
- ◆ Corporate
- ◆ Government departments
- ◆ Educational institutions
- ◆ Community based organisations
- ◆ Farmer groups

# How your support will make a difference? ▶

We believe that individual / corporate's contribution, and participation greatly help function any non-profit organization to substantially continue to put their efforts in creating impact.

## Your contribution

-  will maximize spread climate emergency messages.
-  will sustain our efforts in developing climate solution pathways.
-  will help building social and environmental wealth for our future generations.
